WORK EXPERIENCE

Red Rooster Marketing - 2018

Web Development Intern

Monterrey, Nuevo León, México

June - August 2018

- Helped developing websites and updating them according to the client's new requirements.
- Learned the basics of CSS and HTML and used them with platforms like Wordpress, Themify and Divi.
- Helped tracking Facebook Ads performance for the company's clients.

MAJOR PROJECTS

SafeButton - 2017

An iOS application that shares the location of the user as an emergency in case the user is in a risky situation.

- The application was developed with Swift.
- The code was developed as a team project in pairs.
- Contributed in setting up the user requirements and programmed the buttons of the application.

MediApp - 2017

Designed the requirements of a software application where users could locate the selling points of any drug in nearby pharmacies.

- Designed the prototype for the application's design and a business plan in a 4 members team.
- Contributed in defining the user requirements of the software.
- The simulation of the application considered the contribution of pharmacies in nearby communities to access their database and in exchange the app offered a space for advertisement.
- The prototype was exposed to a jury and was selected from around 50 teams to participate in an Entrepreneurship Competition.
